

HCLSoftware

Integrate Mail, Messaging, Social Collaboration, and Business Apps into a Single Workspace

HCL Notes

HCL Notes is secure app dev and email client software giving teams access to mail, calendar, to-do list, and contact management and seamlessly integrates with other collaboration tools and HCL Domino business applications.

Streamline Operational Workflows

Create custom workflows and applications to automate and speed up operational processes - and integrate Notes with other HCL Domino applications.

Work From Anywhere

Give teams access to secure email, calendar, and contacts - use Nomad and Verse to extend HCL Notes apps and mail to the web and mobile devices.

Access Information, Fast

Improve collaboration by introducing team rooms, forums, file sharing, microblogging, messaging, and user directories as new communication channels.

HCL Notes

Accelerate Innovation. Streamline Work. Increase Collaboration.

Key Features

- ◆ Find out quickly what matters most in your workday.
- ◆ Everything you need in one place.
- ◆ Work from anywhere, on virtually any device.
- ◆ Kick-start the building and customizing of business applications.
- ◆ Keep your data and applications safe from security threats.
- ◆ Maintain administrative controls to enable guardrails and protect your Notes applications.
- ◆ Secure to the core.
- ◆ Minimize admin time spent on keeping everything up-to-date.
- ◆ Streamline admin user database management.
- ◆ Save time and stay organized with OnTime Group Calendar for Notes and Verse.
- ◆ Easily find new solutions to your business challenges.

Benefits

- ◆ HCL Notes provides advanced email management and search features for easy access to important activities.
- ◆ Integrate your calendar with HCL Notes to streamline your work - collaborate seamlessly with your team without having to switch between multiple applications.
- ◆ Give teams access to secure email, calendar, and contacts - Use Nomad and Verse to extend HCL Notes apps and mail to the web and mobile devices.
- ◆ Start building your own business applications with our open-source templates - modify to suit your unique business needs.
- ◆ Application execution control is a security feature that protects your Notes applications from the execution of malicious code.
- ◆ Customize the access control settings to determine who has permission to add, view, or edit applications.
- ◆ All data can be encrypted in use, at rest, and in transit to and from the Domino server.
- ◆ Secure & encrypted replication of changes only, all the way down to the data field level.
- ◆ Use external LDAP sync with Domino and Notes user directory, including password synchronization.
- ◆ OnTime offers an all-in-one group calendar solution for seamless collaboration and optimized scheduling.
- ◆ The HCL Domino Marketplace provides easy access to new apps and tools developed by other Domino/Notes developers for testing or downloading.
