HCL DevOps Velocity

Delivering Better Software, Faster

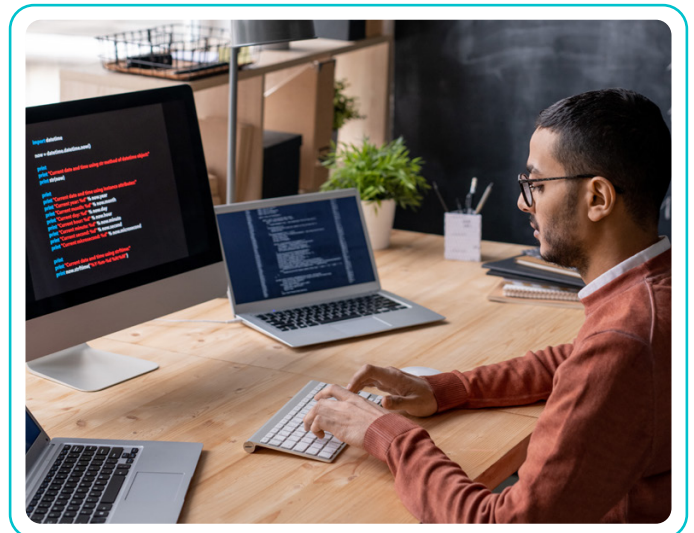

HCL DevOps Velocity

In today's large enterprises, data is scattered across tools, making it difficult to understand the big picture of software operations. HCL DevOps Velocity provides visibility into the entire software development life cycle process to enable faster delivery times.

> Features

- 01 Leverage your value stream with fully interactive, customizable, real-time value stream mapping and visualization that makes work measurable
- 02 With data-driven optimization, you can make better decisions for budgeting, releases, and strategy through flexible dashboards and reports
- 03 Achieve continuous delivery at your pace by leveraging HCL DevOps Velocity's cross-application pipeline and release management features to define delivery patterns that are automatic, on-demand, or somewhere in between
- 04 Integrate quality and security data, such as HCLASoC application vulnerability policies, into your CI/CD pipeline with smart gating logic using robust rule criteria
- 05 No matter the combination of SDLC tools, HCL DevOps Velocity can handle it with our free and expanding plugin ecosystem. Do not see a report, metric, or plugin required for your team? Then utilize our expansive API and toolkit to import data through a custom metric or build-your-own plugin

> Benefits and value

Accelerating software delivery:

HCL DevOps Velocity analyzes data from your entire DevOps toolchain to manage metrics like cycle and lead time, deployment frequency, and flow while identifying opportunities that cause long delays.

Operationalizing governance:

Reduce compliance wait-time and subjective manual approvals with automated governance capabilities that build quality and safety into engineering workflows and your software products.

Making teams faster:

Automate traceability, remove manual work, and identify opportunities. Always have a pulse on development and ditch the status meetings to dedicate time to high-impact meetings.

Ensuring DevOps visibility:

Connecting your entire software delivery and operations toolsets into every team.

Reducing costs and growing revenue:

Grow your revenue with insights into IT's impact on business value with end-to-end visibility of your entire development pipeline.

Achieving business goals:

Keep your enterprise teams coordinated and on track with increased collaboration, project visibility, and better resource management.

About HCLSoftware

HCLSoftware is a division of HCLTech (HCL) that operates its primary software business. It develops, markets, sells, and supports over 30 product families in the areas of Digital Transformation, Data Analytics & Insights, AI and Automation, and Enterprise Security. HCLSoftware has offices and labs around the world to serve thousands of customers. Its mission is to drive ultimate customer success with their IT investments through relentless innovation of its products.
